Repair vs. Ratchet hypothesis

- why not conduct an experiment
in which DNA damage is caused
at 2 time & see if you
can select for changes in
transformation efficiency

If repair hypo. true suggests
that transformations should
occur

- is anything know about
the heritability of any
factors that determine
haploid/diploid

Unisexual Organisms

① Consistencies of trees

① using diff. sequences

② using diff. outgroups

② monitor expression thru
dupmt of some DNA
repair proteins

① control

② w/ mutagen
