

R. Lasker

MDA

- Developed template

- whole genome

- gets some error - alleles drop out

- Molecular Staging

- brought by Quagen

- called RepliG

- Ph. 29 polymerase

- has an exo---

- if protect primers it works better

Single-cell genomics

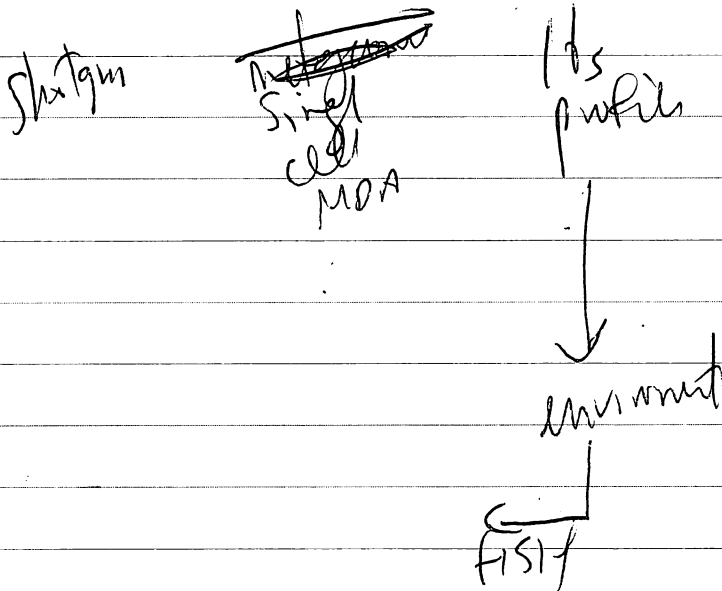

Microfluidic sorting

can make random stuff

Metagenomics

assembly hard

And this w/ uncultured
in book or
Whole Genome Amplification

Some resistance to heavy
partial genomes
