

Manni actinomycete

Drug discovery -

- very little currently from marine environment

- Bryostatin

- D. deminim B

- Ziconotide

- Halichondrin B

- Discodermolide

Rhopalocoids

R. odorabile

- crammed filled w/ microbes

- many Actinomycetes

- cultured assemblage dominated by an α -proteob
(>70% of colonies) - NW001

- in 50 of 52 ~~NW001~~ samples of this species NW001 dominates

- the two w/o, were sick, and had a pathogen

Plasmids

WMT
